

# Go

**What is it:** The largest yacht ever launched by Turquoise, 253ft *Go*, designed inside and out by H2 Yacht Design. Don't miss our exclusive feature in next month's issue.

**Why we love it:** *Go* is the seventh yacht H2 has penned for Turquoise and her sculptural curves and swooping arches take the design of their most recent collaboration – 2012's 238ft *Vicky* – much further.

**Design genius:** The huge beach club is not only spectacular in itself – with a wide door opening on to the sprawling swim platform, a bulging watersports store, big television and glamorous backlit bar – but it can be accessed from the salon. Cool and convenient.

**Perfect for:** Water babies who like to stay as close to the water as possible – preferably with a cocktail in hand.
